

Article Overview

Anping, Hebei, China is a major hub for high-quality stainless steel cable tray mesh, with multiple manufacturers offering 304, 316, and 316L stainless steel options suitable for industrial and commercial wiring applications.

Overview

Stainless steel cable tray mesh from Anping is widely used for supporting and routing electrical cables in industrial, commercial, and infrastructure projects. These trays are typically made from high-grade stainless steel such as 304, 316, and 316L, providing excellent corrosion resistance, durability, and load-bearing capacity . The mesh design allows for ventilation, easy cable management, and reduced weight compared to solid trays.

Key Manufacturers and Suppliers

- o Anping Jingteng Wire Mesh Products Co., Ltd.
 - o Offers 304, 316, and 316L stainless steel wire mesh basket cable trays.
 - o Products are available in bulk quantities with flexible pricing depending on the importing country and order size.
 - o Focuses on exporting worldwide, catering to B2B importers and distributors .
- o Anping County Shangyong Wire Mesh Products Co., Ltd.
 - o Specializes in stainless steel trays, aluminum trays, and wire mesh deep processing products.
 - o Established in 2018, they provide customized solutions for industrial applications .
- o Anping County Weihao Metal Mesh Products Co., Ltd.
 - o Produces stainless steel wire mesh, welded mesh, crimped mesh, and filter elements.
 - o Uses high-quality stainless steel raw materials and advanced German machinery for precision manufacturing.
 - o Exports to regions including the Middle East, Africa, Europe, Australia, and Canada .
- o Anping Sunflower Wire Mesh Making Co., Ltd.
 - o Offers stainless steel cable mesh for industrial and decorative applications.
 - o Focuses on customized mesh solutions for both indoor and outdoor use .

Material and Design

- o Materials: SUS/AISI 201, 202, 302, 304, 304L, 316, 316L, 310, 310S, 321, 430.
- o Mesh Types: Plain square mesh, twill weave, and Dutch weave for specific load or filtration requirements .

Anping Stainless Steel Mesh Cable Tray

o Applications: Electrical cable management, industrial wiring, construction projects, and sometimes decorative or partitioning purposes.

Advantages

- o Corrosion resistance: Ideal for harsh environments.
- o Lightweight and ventilated: Reduces heat buildup around cables.
- o Customizable: Can be tailored to specific dimensions, load capacities, and mesh sizes.
- o Global availability: Many Anping manufacturers export internationally, ensuring supply for large-scale projects. Anping stainless steel cable tray mesh is therefore a reliable choice for industrial and commercial wiring infrastructure, offering a combination of durability, flexibility, and international compliance.
