

Dimensions and Price of Distribution Boxes Inside Cable Wells

Article Overview

Distribution boxes for cable wells typically range from compact sizes around 152x52x22 mm to larger units over 165x58x27 mm, with prices varying by port count, cable length, and features.

Dimensions

Distribution boxes come in various sizes depending on the number of ports and intended application:

- o Small industrial boxes: 152x54x22 mm or 153x54x27 mm, suitable for 4-6 ports, compact for tight cable wells (Amphenol LTW) .
- o Medium boxes: 153x58x26 mm, supporting 6-8 ports, often with LED indicators for power and function .
- o Larger modular boxes: Up to 165.3x52.3x22.85 mm, accommodating multiple connections and pre-wired configurations .
- o Cable length options: Standard pre-wired lengths include 1 m, 2 m, 3 m, 4 m, 5 m, and 10 m, with customization available for longer runs . Boxes are designed for IP65-IP69K protection, ensuring resistance to dust, moisture, and harsh environmental conditions, which is critical for cable well installations .

Features

- o Port configurations: 4, 6, or 8 ports, with options for M8, M12, or M16 connectors .
- o Material compliance: UL-certified, oil-resistant, and suitable for industrial environments .
- o Indicators: Some models include LED indicators for power and function monitoring .
- o Accessories: Waterproof caps, cordsets, and pre-wired cables are available for customization .

Pricing

- o Standard 4-8 port boxes with 1-5 m pre-wired cables typically range from \$50 to \$150 per unit, depending on port count, cable length, and additional features like LED indicators or IP rating .
- o Customized or higher port-count boxes may cost more, especially for longer cables or specialized industrial-grade enclosures .
- o Online marketplaces like Amazon offer smaller residential or commercial distribution boxes starting around \$20-\$40, but industrial-grade units for cable wells are generally higher-priced .

Selection Tips

- o Ensure the box fits the cable well dimensions and allows for easy maintenance access.
- o Choose an IP rating appropriate for the environment (IP65 or higher for outdoor or wet conditions).

Dimensions and Price of Distribution Boxes Inside Cable Wells

- o Consider port count and cable length to match your system requirements.
- o Verify compliance with local electrical codes and standards for safety and durability . By selecting the appropriate size, port configuration, and protection level, distribution boxes can provide efficient cable management, reliable connectivity, and long-term durability inside cable wells.
