

Article Overview

Fiber Solutions and ELCOPE are key Peruvian companies offering direct sales of optical cables and related telecommunications products.

Key Peruvian Suppliers

Fiber Solutions is a Peruvian company with over 10 years of experience in the telecommunications sector, specializing in the import and commercialization of fiber optic products. They provide comprehensive solutions for fiber optic projects, including various types of cables and accessories, and offer personalized attention for clients, making them a primary direct sales point in Peru (Fiber Solutions) . ELCOPE - Electro Conductores Peruanos has more than 33 years of experience in manufacturing and distributing electrical conductors and related products. While primarily focused on electrical conductors, ELCOPE also supplies components relevant to fiber optic infrastructure and can serve as a direct sales contact for bulk or specialized orders (ELCOPE) .

Additional Considerations

Other companies in Peru, such as Fibertel and Kroton, provide fiber optic services and structured cabling solutions, including consultancy, design, and implementation. While they are more service-oriented, they can also facilitate direct procurement of fiber optic cables for business or government projects (Ensun) . For international components like optical transceivers or specialized fiber optic modules, companies such as HuiGoo Optic supply a wide range of fiber optic components globally, though they are not Peruvian-based. They can complement local suppliers for advanced or high-precision optical components (HuiGoo Optic) .

How to Access Direct Sales

- o Contact Fiber Solutions directly through their website to inquire about product catalogs, pricing, and bulk orders.
- o Reach out to ELCOPE for specialized electrical and fiber optic conductor products.
- o Engage with service providers like Fibertel or Kroton if your project requires integrated solutions including installation and network design. These companies represent the main direct sales points for optical cables in Peru, offering both local manufacturing and import options to meet diverse telecommunications needs.
