

Embedded parts for cable trays and hangers

Article Overview

Embedded parts for cable trays and hangers include supports, brackets, clamps, and fittings that secure, connect, and guide cable trays in industrial and commercial installations.

Types of Embedded Parts

1. Hangers and Supports Hangers suspend cable trays from ceilings, beams, or walls. Common types include:

- o Trapeze Hangers: Support trays from two points, ideal for wide trays or heavy loads .
 - o Center Hangers: Single-point suspension for balanced loading of narrow trays .
 - o L-Brackets and Universal Brackets: Attach trays to walls or channel framing without bolts .
 - o Triangle Support Brackets: Provide rigid support for ceiling or wall-mounted trays .
2. Clamps and Hold-Downs Clamps secure trays to structural elements or prevent cable movement:
- o Beam C-Clamps and I-Beam Clamps: Attach trays to beams with high load capacity .
 - o Channel Clamps: Fit standard channels and allow swivel adjustments .
 - o Hold-Down Clamps: Heavy-duty clamps for ladder trays, reducing field labor by eliminating drilling .

3. Connectors and Fittings These parts join or redirect trays:

- o Straight Connectors and Splice Plates: Join two tray sections in-line .
- o Elbows, Tees, Crosses, and Bends: Change tray direction horizontally or vertically .
- o Reducers and Offset Connectors: Adapt trays of different widths or heights .
- o Flexible Expansion Couplers: Compensate for thermal expansion .

4. Cable Protection and Segregation Accessories

- o Covers and End Plates: Protect cables from mechanical damage and environmental factors .
 - o Dividers/Barrier Strips: Separate different cable types within the same tray .
 - o Drop-Out Plates: Support cables as they exit the tray, reducing stress .
5. Mounting Hardware
- o Threaded Rods, Nuts, and Washers: Used with hangers and brackets for suspension .
 - o Wall and Ceiling Mounting Brackets: Provide secure attachment points for horizontal or vertical trays .
 - o Rack-to-Runway Plates: Connect trays to equipment racks or auxiliary supports .

Materials and Load Considerations

Embedded parts are typically made from galvanized steel, stainless steel, aluminum, or fiberglass-reinforced plastic (FRP), offering corrosion resistance and structural strength . Load capacities vary by type and material, with heavy-duty clamps supporting up to 1,275 lbs and standard hangers supporting 50-400 lbs depending on configuration .

Installation Guidelines

Embedded parts for cable trays and hangers

- o Supports should be spaced according to tray type and load, typically every 6-8 feet for ladder or ventilated trays .
- o Connectors should be positioned so that splice joints fall between support points for stability .
- o Proper alignment and secure fastening of hangers, clamps, and brackets are essential to prevent sagging and ensure safety . Embedded parts are critical for a reliable, flexible, and safe cable management system, allowing for easy installation, future modifications, and protection of electrical and communication cables in commercial and industrial environments .

Shop cable tray accessories like hangers, brackets, fixings & joiners in HDG, stainless & aluminium, at RS with fast Australia-wide

TechLine Mfg. offers various supports for its Snap Track products including hangers, brackets and clamps. Scroll to bottom of page

We manufacture a wide range of products capable of providing the characteristics which respond to the proposed application, along

Whether your system uses ladder cable trays, perforated trays, wire mesh trays, FRP, aluminum, stainless

Hi, After discovering the new MEP Fabrication Part tool in Revit 2017, I am now trying to add hangers on my cable

As the leading cable tray manufacturers and suppliers, JLH Electric offers a wide range of accessories and spare items, including

Whether you're upgrading an existing infrastructure or building a new system from scratch, RS has you covered with high-quality

In addition to the covers, optional accessories in various materials and coatings are available to

For all your cable tray accessory needs, Channel and Tray is the premier cable tray

Cable Tray ABW4SB-3 Barrier Strip, 3 m L x 4 in H, For Use With Aluminum Cable T... MfrPN ABW4SB-3

Cable tray fittings and accessories play a crucial role in the seamless installation of a comprehensive cable

Explore Direct Channel's range of cable tray brackets and hangers, including stand-off brackets, G hanger
