

Article Overview

Hexatronic Tallinn is the largest fiber optic termination facility in the Baltic and Scandinavia, producing high-quality fiber optic products for multiple industries.

Hexatronic Tallinn

Located in Tallinn, Estonia, Hexatronic's production site is a 700 m² facility that has been operational since 2002 and is recognized as the largest fiber optic termination house in the Baltic and Scandinavian region . The factory operates two shifts to meet high customer demand and ships products across Europe directly from its on-site warehouse. Hexatronic Tallinn produces a wide range of fiber optic assemblies and components, serving mobile network operators, telecom network owners, installers, military, and power sectors. The facility is ISO 9001, 14001, and 45001 certified, ensuring high-quality standards .

Other Estonian Fiber Optic Companies

- o Estonian Fiber focuses on fully digital network planning and fiber optic network deployment for residential and commercial customers, emphasizing advanced GIS and planning technologies .
- o Fineltec manufactures various multifiber cables, including singlemode, multimode, and hybrid types, with over 25 years of experience in high-quality fiber optic production .
- o Astrec Baltic provides fiber optic infrastructure components and training for installers, highlighting efficiency and quality in telecommunications solutions .
- o A-Kaabel specializes in fiber optic cable installation, offering services such as laying underground cables, overhead lines, and testing, with up to 10 years warranty on installations .

Industry Significance

Estonia's fiber optic manufacturing sector is notable for its highly digitized operations, advanced production technologies, and strong regional presence. These factories not only supply the domestic market but also export to Scandinavia and other European countries, supporting the growth of high-speed data networks and modern telecommunications infrastructure . These facilities collectively make Estonia a key player in the Baltic fiber optic industry, combining production, installation, and network planning expertise to meet both commercial and industrial demands.
