

Article Overview

The primary fiber optic providers in Belize are Belize Telemedia Limited (BTL/Digi) and Smart Belize, with additional regional providers like Centaur Communications serving specific areas.

Major Providers

1. Belize Telemedia Limited (BTL/Digi) BTL, operating under the brand Digi, is the largest telecommunications company in Belize, offering mobile, landline, broadband, and business solutions. It provides extensive fiber-optic internet with speeds exceeding 200 Mbps in many urban areas, including Belize City and San Pedro. Digi is government-affiliated and has widespread coverage, making it the most prominent fiber-optic provider in the country . 2. Smart Belize (Smart Com Belize Limited) Smart is another major ISP offering broadband and mobile services. While it primarily uses wireless broadband technology, it also provides fiber-optic connections in select urban and business districts. Smart is considered an alternative provider to Digi, with coverage in key towns and growing fiber availability .

Regional and Specialized Providers

3. Centaur Communications Founded in 1990, Centaur Communications provides high-speed internet and digital television services, including fiber-optic connections in northern towns like Orange Walk and Corozal. It focuses on regional coverage rather than nationwide service . 4. Other Providers Smaller or niche providers, such as Infinite Wireless & Networking, focus on high-speed wireless internet in areas like the Cayo District, while satellite providers like Viasat and HughesNet serve remote locations where fiber infrastructure is limited .

Summary

For most residents and businesses in Belize, Digi (BTL) and Smart Belize are the main fiber-optic internet providers, offering reliable high-speed connections in urban and commercial areas. Regional providers like Centaur Communications supplement coverage in northern towns, while wireless and satellite options fill gaps in remote or rural regions .
