

Article Overview

Several specialized companies provide fiber optic modules, repair, and installation services, including ProSplice, BTX Technologies, FiberOptics.com, and The Fiber Guy.

Leading Fiber Optic Repair and Module Providers

ProSplice offers comprehensive fiber services including design, installation, splicing, repair, emergency restoration, and project management. Their technicians are highly trained and equipped with advanced tools to handle turnkey projects and emergency repairs efficiently . BTX Technologies operates an in-house fiber lab for repairing and assembling fiber optic cables. They handle all connector types, including LC, SC, ST, Lemo, and Neutrik, and provide testing and cleaning services to restore cables to optimal condition . FiberOptics.com provides sales, rentals, and repairs of fiber optic equipment. Their in-house technicians service all major brands, offering calibration, maintenance, and repair services for optical tools and assemblies . FiberTechs specializes in fiber optic installation, fusion splicing, testing, certification, and network audits. They also provide consulting services for telecommunications projects and structured cabling systems . Assurance Media delivers fiber optic network design, installation, repair, and testing. Their BICSI-certified technicians handle indoor and outdoor cabling, fusion splicing, mechanical splices, and fiber terminations . The Fiber Guy focuses on custom and standardized fiber cables, offering evaluation, repair, and rush services. They repair TAC, SMPTE, OpticalCON, and expanded beam cables, providing a one-year warranty on all repairs . FIS Blue provides repair services for SMPTE, TFOCA-II, Expanded Beam, and other fiber assemblies. They offer evaluation, repair, and testing to ensure cable assemblies perform reliably . Markertek repairs LEMO, OpticalCON, Canare, and other fiber cables, using advanced testing and diagnostic equipment to restore cables to original specifications .

Services Offered

- o Fiber Cable Repair: Fusion splicing, mechanical splicing, connector replacement, and testing.
- o Custom Cable Fabrication: Standard and custom lengths, ruggedized cables, and specialized connectors.
- o Emergency Restoration: Rapid response for network outages or damaged fiber lines.
- o Testing and Certification: OTDR testing, interferometry, and certification for compliance.
- o Consulting and Design: Network audits, structured cabling design, and turnkey project management.
- o Equipment Rentals and Sales: Fiber splicers, cleavers, OTDRs, power meters, and Go-Kits. These companies serve a wide range of clients, including broadcasters, telecommunications providers, IT professionals, and large enterprises, ensuring reliable fiber optic network performance and cost-effective repair solutions.
