

Article Overview

High-density server racks, including 42U and 48U fully enclosed cabinets, are available in fixed stock from RackSolutions and Vertiv, ready for immediate deployment.

Rack Options and Features

RackSolutions 151DC Data Center Racks are fully enclosed and compatible with Dell, HP, IBM, and most standard servers. They meet EIA 19" standards and are available in 42U and 48U heights, ideal for high-density server rooms or data centers. These racks ship fully assembled on pallets and include locking front and rear doors, side panels, and vertical cable management bars. The design supports high-density cabling and allows installation of multiple PDUs side by side, with optional casters and leveling feet for mobility and stability . Vertiv VR Racks are designed for high power density environments and support a wide range of equipment including servers, storage, switches, routers, PDUs, UPSs, and KVM switches. They come in 42U and 48U heights, widths of 600mm and 800mm, and depths of 1100mm and 1200mm, with additional sizes available on request. Features include 77% perforated locking doors, split side panels, high-density cable entry for up to 2000 Cat 6 cables, and full-height PDU mounting brackets. Vertiv racks are delivered ready for high-density deployment and are supported through regional inventories for rapid availability .

Additional Considerations

- o Cable Management: Both RackSolutions and Vertiv racks provide vertical and recessed cable management to optimize airflow and reduce clutter.
- o Security: Locking doors and side panels ensure physical security for critical equipment.
- o Pre-Assembly: Racks ship fully assembled, reducing setup time and enabling faster deployment.
- o Compatibility: Standard 19" EIA rails allow integration with a wide range of servers and networking equipment.
- o Accessories: Optional upgrades include casters, leveling feet, combination locks, and additional PDU mounting options. These high-density racks are suitable for mission-critical environments, offering flexibility, reliability, and immediate availability for organizations looking to expand or normalize their data center infrastructure. For purchasing, you can contact RackSolutions or Vertiv channel partners to confirm current fixed stock and delivery options .
