

How much does a primary electrical distribution box cost in Jamaica

Article Overview

A primary electrical distribution box in Jamaica typically costs between JMD 15,000 and JMD 50,000, depending on capacity, brand, and features.

Overview

A primary electrical distribution box (also called an AC distribution box) is used to safely distribute electricity from the main supply to multiple circuits in residential, commercial, or industrial settings. It protects circuits from overloads, short circuits, and electrical faults while ensuring stable power delivery .

Price Range

- o Basic residential units: Approximately JMD 15,000-25,000, suitable for small homes or light commercial use.
- o Medium-capacity units: Around JMD 25,000-35,000, often used in larger homes or small businesses.
- o High-capacity or industrial-grade units: Can cost JMD 35,000-50,000 or more, designed for heavy-duty applications and multiple circuits . Prices vary based on brand, material quality, number of circuits, and additional safety features. Some suppliers may also include installation costs, which can add JMD 5,000-15,000 depending on complexity and labor rates in Jamaica .

Additional Considerations

- o Installation: Hiring a certified electrician is recommended to ensure compliance with safety standards and local regulations.
- o Warranty and durability: Higher-quality boxes often come with longer warranties and better resistance to environmental factors.
- o Availability: Local hardware stores and specialized electrical suppliers in Jamaica, such as Jamaica Power, provide a range of options . In summary, budgeting JMD 20,000-50,000 for a primary electrical distribution box, including installation, is a reasonable estimate for most residential and commercial projects in Jamaica.
