

How much does it cost to replace a fiber optic cable with a router

Article Overview

Replacing a router and installing fiber optic cable typically costs between \$1,500 and \$7,000, depending on installation complexity and equipment.

Fiber Optic Installation Costs

Installing fiber optic cable in a home generally ranges from \$1,500 to \$7,000, with an average around \$4,500 for standard installations . Costs vary based on:

- o Cable length: Longer runs increase material and labor costs, typically \$1 to \$12 per linear foot .
- o Installation method: Options include aerial, underground, direct burial, or indoor-only runs, with underground being more expensive .
- o Property layout: Multi-story homes, long indoor pathways, or complex routing increase labor and permit fees, which can range from \$50 to \$500 .
- o Fiber type: Single-mode fiber is cheaper per foot than multimode fiber but may require more expensive equipment . For smaller projects, such as wiring a single room or home office, costs are lower, while whole-home or multi-building installations are at the higher end of the range .

Router Replacement Costs

Replacing a router typically costs \$100 to \$500, depending on features and capabilities. Router/modem combos may cost more, and additional access points may be needed for large or multi-level homes . Professional setup can add \$50 to \$100 per hour, with 1-3 hours typically required for installation .

Total Estimated Cost

Combining fiber optic installation and router replacement, a typical home upgrade could cost:

- o Low-end: \$1,500-\$2,500 for simple installations with basic router replacement.
- o Average: \$3,500-\$5,000 for standard whole-home installations with mid-range router.
- o High-end: \$6,000-\$7,000+ for complex multi-story homes, long cable runs, or premium routers .

Additional Considerations

- o Permits and site prep: May add \$50-\$500 depending on local regulations .
- o Equipment quality: Higher-end routers or pre-terminated fiber assemblies increase costs .
- o Professional installation: Recommended for compliance with building codes and optimal performance .

How much does it cost to replace a fiber optic cable with a router

o Long-term benefits: Fiber optic networks offer faster speeds, higher reliability, and lower maintenance compared to copper or wireless setups . By obtaining multiple quotes and confirming what is included (equipment, labor, permits), homeowners can better estimate the total cost for upgrading to a fiber optic network with a new router.

Buying fiber optic installation services involves several cost components, with total price influenced by length, location,
