

## Article Overview

Yes, cable trays in New Zealand are fully customizable, with local manufacturers offering tailored designs, materials, and finishes to meet specific project requirements.

## Local Customization Options

Several New Zealand companies provide custom cable tray solutions:

- o Tilley & Patton Ltd offers a comprehensive in-house design and manufacturing service, specializing in sheetmetal products and components. They provide custom solutions for cable support systems across New Zealand, allowing for tailored dimensions, fittings, and support brackets to suit project needs .
- o Mechanical Support Systems (MSS) manufactures high-quality cable trays, ladders, and mesh systems locally. Their in-house capabilities allow for custom fabrication, including pre-galvanized, hot-dip galvanized, aluminum, stainless steel, and powder-coated finishes. MSS can adapt designs quickly to changing project requirements, ensuring compliance and reliable supply .
- o FDG NZ stocks a wide range of cable trays, ladders, and baskets that can be custom painted, modified, or adjusted to accommodate unique cable configurations. Their modular systems and configurable support options make it easy to tailor solutions for commercial, industrial, or infrastructure projects .

## Benefits of Customization

- o Material flexibility: Options include steel, aluminum, stainless steel, and coated finishes for corrosion resistance and aesthetic requirements.
- o Size and configuration: Trays can be designed to specific widths, depths, and lengths, including modular or adjustable systems.
- o Project-specific fittings: Custom brackets, supports, and accessories ensure proper installation and compliance with local standards.
- o Rapid response: Local manufacturing allows faster lead times and the ability to adapt to design changes during the project lifecycle.

## Conclusion

Cable trays in New Zealand are not limited to standard sizes or finishes. Local manufacturers provide fully customizable solutions to meet diverse project requirements, from industrial and commercial installations to specialized infrastructure projects, ensuring both functional and aesthetic needs are met .
