

Price of Custom-Made Mesh Cable Trays in Haiti

Article Overview

Mesh-style (wire basket) cable trays in Haiti typically range from \$2 to \$25 per meter, depending on material, size, and finish.

Overview of Pricing

Wire mesh cable trays, also known as basket trays, are among the most affordable cable management solutions due to their lightweight design and ease of installation. The average price per meter ranges from \$2 to \$25, with lower prices for pre-galvanized steel and higher prices for stainless steel or aluminum trays . Bulk orders or project-based purchases can reduce the cost significantly.

Material and Finish Impact

- o Pre-Galvanized Steel (PG): Most cost-effective, suitable for dry indoor environments like offices or schools .
- o Hot-Dip Galvanized Steel (HDG): More expensive, ideal for outdoor or industrial settings due to superior corrosion resistance .
- o Aluminum: Lightweight and rust-proof, moderately high cost, reduces the need for heavy support brackets .
- o Stainless Steel: Highest priced, used in hygienic or highly corrosive environments such as coastal areas or food processing plants .

Local Suppliers in Haiti

Haiti has local manufacturers such as Jeetmull Jaichandlall (P) Ltd., which provide wire mesh cable trays in various sizes, shapes, and finishes . These suppliers offer customization to meet industrial, commercial, or construction requirements, ensuring high-quality standards and durability.

Additional Cost Considerations

- o Accessories: Brackets, hangers, and corner pieces are required for installation and add to the total cost .
- o Labor and Shipping: Skilled labor and transportation costs in Haiti may influence the final price.
- o Project Scale: Large-scale installations often benefit from discounted bulk pricing .

Practical Tip

For lightweight data or networking cables, wire mesh trays are ideal due to their ventilation, ease of cutting, and flexibility in routing cables. Choosing the right material and finish based on environmental conditions ensures longevity and cost-effectiveness . In summary, when budgeting for mesh-style cable trays in Haiti,
