

Article Overview

The price of a single-phase distribution box in Malaysia typically ranges from RM100 to RM500, depending on capacity, brand, and features.

Product Prices

Single-phase distribution boxes (DB boxes) vary in price based on the number of circuits and included components. For example, a 26-way to 28-way single-phase DB box with a 63A main switch, ELCB, and multiple MCBs can be purchased as a full set from RM300 to RM500, depending on the brand and supplier. Smaller or simpler DB boxes with fewer circuits (6-12 ways) are generally priced between RM100 and RM250. Most products are PVC-insulated, SIRIM-approved, and suitable for residential, commercial, or industrial applications.

Installation Costs

The cost of installing a single-phase DB box is separate from the product price and depends on the number of circuits and location. For a basic installation covering 6-8 circuits, the estimated cost is around RM150-RM250, which usually includes the DB box, main switch, and MCBs. For installations with 8-12 circuits, the cost can rise to RM250-RM400, especially if additional wiring or modifications are required. Urban areas like Kuala Lumpur or Johor Bahru may have higher labor costs compared to rural areas.

Factors Affecting Price

- o Number of circuits: More circuits increase both the DB box price and installation cost.
- o Brand and quality: Recognized brands like Maxguard or SIRIM-approved components are more expensive but ensure safety and durability.
- o Material: PVC boxes are common and affordable, while metal enclosures may cost more.
- o Location and labor: Urban areas generally have higher installation fees.
- o Additional features: ELCB, copper busbars, and higher-rated MCBs increase the total cost.

Summary

For a typical residential single-phase DB box in Malaysia:

- o Product price: RM100-RM500 depending on size and features.
- o Installation cost: RM150-RM400 depending on circuits and location. By comparing suppliers and ensuring the use of certified components, you can balance cost and safety for your electrical installation.
