

Price of electrical distribution boxes in Palestinian construction projects

Article Overview

Prices for electrical distribution boxes in Palestinian construction sites typically range from \$150 to \$800 per unit, depending on size, material, and specifications.

Overview of Products

Construction site electrical distribution boxes are available in fiberglass, polyester, and sheet steel enclosures, often compliant with IEC 61439 and IEC 60364 standards. They can include internal doors, pre-wired circuits, and IP-rated protection (IP65-IP67) for outdoor use . Typical configurations support single-phase or three-phase connections, with options for fused primary disconnects and multiple receptacles for powering tools and temporary site equipment .

Typical Price Ranges

- o Small single-phase boxes (for light construction use): \$150-\$250 per unit
 - o Medium three-phase boxes (with multiple outlets and fuses): \$300-\$500 per unit
 - o Large, heavy-duty or customized boxes (sheet steel, high IP rating, pre-wired): \$600-\$800 per unit
- Prices vary based on material quality, customization, and delivery options. Pre-wired or modular units tend to be at the higher end of the range .

Local Suppliers and Procurement

Several Palestinian companies and distributors provide electrical distribution equipment:

- o Gaza and Bethlehem suppliers: Manufacturing and designing of industrial distribution boards and switchboards
- o Ramallah-based suppliers: Electrical and electronic equipment for construction and industrial use
- o Tender opportunities: Government and private tenders for supply and installation of electrical materials are regularly published on platforms like GlobalTenders and Jobs.ps

Recommendations

- o Contact local suppliers directly to request updated price lists and availability.
- o Check tender portals for bulk procurement opportunities, which may offer lower unit prices.
- o Specify required standards (IP rating, material, amperage) to ensure compliance with Palestinian construction regulations. By combining supplier inquiries with tender information, construction projects in Palestine can secure cost-effective and compliant electrical distribution boxes for site use.
