

## Article Overview

Fireproof cable trays in Sweden typically range from \$20 to \$50 per meter, depending on material, type, and specifications.

## Pricing Overview

The cost of fireproof cable trays in Sweden depends on several factors, including the material, type of tray, size, and surface finish. Common materials for fire-resistant trays include stainless steel, aluminum, and composite fiberglass (FRP/GRP), which are suitable for both onshore and offshore projects. Stainless steel trays are more expensive due to corrosion resistance, while aluminum is lightweight but pricier than steel. Composite trays offer fireproofing and chemical resistance, often used in specialized industrial environments.

## Typical Price Ranges

- o Steel trays (galvanized or coated): \$10-\$30 per meter
  - o Aluminum trays: \$20-\$50 per meter
  - o Custom or coated fireproof trays: Can exceed \$50 per meter depending on specifications and certifications
- Additional costs include installation, accessories, shipping, and labor, which can significantly affect the total project cost. Bulk orders or large-scale projects may benefit from volume discounts.

## Market Considerations in Sweden

The Swedish cable tray market is mature and highly regulated, emphasizing fire safety, load-bearing certification, and compliance with EU construction product regulations (CPR). Demand is driven by commercial construction, data centers, renewable energy projects, and industrial facilities, particularly in regions like Stockholm, Gothenburg, Malmö, and northern industrial hubs. Suppliers often provide technical consultation and system design services, which can influence pricing beyond the base material cost.

## Cost-Saving Tips

- o Choosing perforated trays instead of ladder trays can reduce costs by 15% or more if load requirements allow.
  - o Ordering in bulk or negotiating with suppliers can lower per-meter prices.
  - o Considering pre-galvanized or powder-coated finishes may balance durability and cost.
- In summary, for a standard fireproof cable tray in Sweden, expect \$20-\$50 per meter, with the final cost influenced by material, fireproof rating, installation complexity, and project scale.

# Price of fire-resistant cable trays in Sweden

More than a firestop the roxtec sealing system for cables and pipes protects against fire - but also against gas, water, and several

Find top-rated fire stopping cable tray solutions with fire resistance, UL certification, and customization options. Click to
