

Price of outdoor power distribution box sunshade

Article Overview

Outdoor power distribution box sunshades typically range from \$50 to \$300 depending on size, material, and customization options.

Outdoor sunshades are designed to protect electrical enclosures from direct sunlight, UV exposure, and heat, which helps prevent equipment failure and extends the life of internal components . Standard fiberglass or FRP sunshades for control panels and distribution boxes can be purchased in pre-made sizes or custom-built to fit specific enclosures . Factors affecting price:

- o Size of the enclosure: Larger boxes require bigger sunshades, increasing material costs .
- o Material: Fiberglass, FRP, or UV-resistant plastics are common; more durable materials cost more .
- o Design features: Vented or spaced configurations for airflow, extended side panels, or custom mounting options can raise the price .
- o Supplier and brand: Prices vary between suppliers like TRACOM, RSP Supply, and general marketplaces such as Amazon or Alibaba . Typical price ranges:
 - o Small standard sunshades: \$50-\$100
 - o Medium-sized or vented sunshades: \$100-\$200
 - o Large or custom-built sunshades: \$200-\$300+ For purchasing, you can explore suppliers such as TRACOM for fiberglass sunshades, RSP Supply for solar shields, or general marketplaces like Amazon and Alibaba for various outdoor power distribution boxes and compatible sunshades . Always check the dimensions and compatibility with your specific enclosure before ordering.
