

Saudi Arabia Fireproof Cable Tray Price Quote

Article Overview

Fireproof cable trays in Saudi Arabia typically range from SAR 150 to SAR 600 per meter, depending on material, size, and certification.

Factors Affecting Price

o

Material: Fireproof cable trays are commonly made from galvanized steel, stainless steel, aluminum, or FRP/GRP composites. FRP/GRP trays are corrosion-resistant and suitable for harsh environments, often costing more than standard steel trays .

o

Tray Type and Design: Ladder, perforated, and straight trays vary in price. Perforated trays and specialized bends (e.g., Omega or round flange) are more expensive due to manufacturing complexity .

o

Dimensions: Width, height, and thickness directly influence cost. Common widths include 75mm, 100mm, 150mm, with thicknesses from 1.5mm to 3mm . Larger or thicker trays increase load capacity but also raise the price.

o

Certification and Standards: UL-certified or fire-resistant trays command higher prices due to compliance with safety and industrial standards .

o

Project Volume and Supplier: Bulk orders or long-term contracts may reduce per-meter costs. Suppliers like Hitech Fence and Youmats provide customized quotes based on project BOQs and delivery requirements .

Typical Price Range

o Standard galvanized steel trays: SAR 150-250 per meter

o Powder-coated or stainless steel trays: SAR 250-400 per meter

o FRP/GRP fireproof trays: SAR 400-600 per meter, depending on size and load capacity

How to Get Accurate Pricing

To obtain precise pricing for your project:

Saudi Arabia Fireproof Cable Tray Price Quote

- o Share your BOQ (Bill of Quantities) with suppliers for a tailored quote .
- o Specify material, dimensions, and fireproof requirements.
- o Consider delivery location and installation services, as these can affect total cost.
