

Article Overview

South Korea hosts several reputable spectrometer suppliers and manufacturers, including Laboid International, Withlight Co., Ltd, NuCare Medical Systems Inc., Korea Spectral Products, and Jeol Korea Ltd.

Key Suppliers and Manufacturers

Laboid International is a prominent supplier and exporter of spectrophotometers in South Korea, offering a wide range of precision instruments for research and laboratory applications. They emphasize quality, innovation, and reliable logistics to ensure prompt delivery and global reach . Withlight Co., Ltd specializes in measurement instruments including LED, OLED, PD, LD, and other light source equipment. They provide over 30 models and focus on optical measurement solutions suitable for various scientific applications . NuCare Medical Systems Inc. operates in the field of radiation monitoring and nuclear medicine, offering NaI(Tl)+PMT-based gamma detection and monitoring systems, which are relevant for specialized spectrometry applications . Korea Spectral Products and Jeol Korea Ltd. are also notable suppliers, providing optical instrumentation, monochromators, spectrographs, photoluminescence mapping systems, and Raman measurement systems. These companies cater to both research and industrial spectroscopy needs .

Finding Additional Suppliers

Platforms like Panjiva and LabSupplies Connect aggregate information on South Korean spectrometer manufacturers and analytical instrument suppliers, allowing users to compare vendors, request quotes, and access international trade data . These resources are useful for identifying qualified suppliers and evaluating their product offerings.

Summary

South Korea offers a diverse range of spectrometer suppliers, from general laboratory equipment providers to specialized optical and radiation measurement companies. For research or industrial procurement, companies like Laboid International, Withlight Co., NuCare Medical Systems, Korea Spectral Products, and Jeol Korea Ltd. are reliable starting points, with additional options accessible through trade platforms for broader selection and comparison .
