

Which factory in Finland manufactures optical modules

Article Overview

Key Finnish companies producing optical modules include Bevenic, Kimmy Photonics, and Senop, all offering advanced photonics and custom optical solutions.

Leading Companies

Bevenic Oy is a prominent Finnish provider of optics and photonics solutions, specializing in the design, testing, and manufacturing of optical fibers, components, and assemblies. They offer complete services from design to mass production, including fiber bundles, sensor probe heads, low- and high-power connectors, and precision mechanical assemblies. Bevenic also provides compression-molded optics for high-quality glass pressings, widely used in applications such as airport runway lighting . Kimmy Photonics supplies precise optical instruments, lasers, sensors, and laser-based solutions for research, industrial, and OEM applications. Their product range includes laser vibrometers, optical surface profilers, broadband light sources, and compact spectrometers for near-infrared applications. Kimmy Photonics focuses on high-precision instruments suitable for integration into other devices, supporting both scientific and industrial needs . Senop develops high-quality custom optics and optical components, including imaging modules, optodetector modules, and light source projects. They provide turnkey solutions combining optical components with electrical platforms, serving international clients in diverse industries. Senop specializes in hyperspectral imaging, thermal imagers, and advanced optical modules for challenging environments, offering both design and manufacturing services .

Industry Support and Networking

Photonics Finland is a technology cluster that connects Finnish photonics companies, universities, and research institutes. It promotes collaboration, innovation, and internationalization of photonics businesses, providing access to events like Optics & Photonics Days and international exhibitions such as Photonics West and Laser World of Photonics . This cluster is a valuable resource for identifying additional optical module manufacturers and suppliers in Finland. These companies collectively represent Finland's advanced capabilities in optical module design, prototyping, and production, serving both domestic and international markets.

Bevenic is Finland's leading manufacturer of specialty optical fibers and capillaries. Our

ASML is the leading supplier to the semiconductor industry, driving lithography system innovation to make

Want to Find More Optical Communication Systems Companies? If you want to find more companies that

Which factory in Finland manufactures optical modules

provide optical

Bevenic Oy is a prominent Nordic contract manufacturer that specializes in innovative photonics solutions, offering customized

Whitepoint Optics specializes in manufacturing high-quality cinema lenses designed for the motion picture industry, utilizing premium

We specialize in high-quality custom optics and optical components and provide turnkey service according to customer preferences.

Since 1991, we have developed lasers, optical systems, and sensor technologies to meet the growing demands of automation,

Welcome to Photonics Finland Members database. You can search members by name, or any relevant keyword such as "laser"

Senop is a trusted Finnish manufacturer of high-precision custom glass optics, optical components and imaging solutions with

Photonics Finland has over 250 individual and 118 organizational members. Photonics Finland supports the development of new

Cisco Systems, Inc. offers optical transceiver modules used in various networking applications, ranging from campus to data centers

Photonics Finland is a technology operation and ensuring that Finland cluster that promotes the photon-remains a global leader in

Optical Transceivers Get the pluggable module performance you need from the manufacturer of choice for

With over 250 individual and over 130 organizational members, Photonics Finland is the largest photonics community in the Nordics,

Senop is the leading provider of high-quality custom optics in the Nordics. We serve leading international companies and research

Sales of publicly traded manufacturers of optical components and modules reached just \$8.9 billion in 2021. The net income of the
